Respected Hiring Manager,

I am excited to be applying for the Front-End Web Developer Internship for The Web Design Hub, LLC. I am currently a Junior majoring in Computer Science from the University of Louisiana Monroe. I have more than two years of experience developing dynamic websites using core web technologies including HTML, CSS, JavaScript, PHP etc. I am a creative and confident developer, fast learner with a passion to excel in the field of web development.

I am passionate about building interactive, easy to use, user-friendly websites and applications and I am confident I would be a valuable asset to your organization. In addition to my knowledge and experience on web development, I actively seek out new technologies and stay up-to-date on industry trends and standards. This has allowed me to stay ahead of the curve and deliver exceptional work to all my employers, including those I've worked for on a project basis.

Thank you for reviewing my background in consideration for your internship opportunity. A copy of my resume is attached. I would be encouraged to have the opportunity to set up a meeting with you to discuss more details of my coursework, projects, and other experiences. You can reach me out at 318-538-9201.

Thank you again,
Rohan Maharjan
