---

## EDUCATION

---

**Bachelor of Science** - Computer Science, May 2020

**University of Louisiana Monroe** - Monroe, LA

**GPA** - 3.89

---

## WORK HISTORY

---

**Web Developer**, 08/2016 to Current

**University of Louisiana Monroe** – Monroe, Louisiana

- Built data visualization tool using D3.js library to help phage researchers find cure for tuberculosis which increased their understanding of different phage genomes.
- Wrote clean and efficient code in HTML, CSS, PHP, and JavaScript libraries for re-usability and scalability.
- Optimized web assets and wrote faster algorithms to improve performance which increased speed by 12%.
- Developed and designed MySQL databases to store and retrieve millions of phage data and studied them using the visualization tool.

**3D Augmented Reality Developer**, 01/2017 to Current

**University of Louisiana Monroe** – Monroe, Louisiana

- Developed interactive augmented reality application using Unity for the university museum which gave visitors an innovative way to learn about the artifacts.
- Wrote C# scripts in visual studio to develop a user interface for cross-platform devices in augmented reality which enabled students using any smartphones to use the application.
- Worked closely with a faculty to create user interface and implement application logic using agile process for faster development.
